Environmental Entomology

Environmental Entomology is published in February, April, June, August, October, and December. The journal publishes reports on the interaction of insects with the biological, chemical, and physical aspects of their environment and is divided into the following sections: Forum, Population Ecology; Community and Ecosystem Ecology, Insect-Symbiont Interactions; Biological Control of Pests and Predators; Insect-Microbial Interactions; Biological Control-Weeds; Pollinator Ecology and Management; Plant-Insect Interactions; Behavior; Sampling; Pest Management; Chemical Ecology; Physiological Ecology; Molecular Ecology and Evolution; Transgenic Plants and Insects. In addition to research papers, Environmental Entomology publishes Letters to the Editor, interpretive articles in a Forum section, and Reviews Articles. The same guidelines apply to these as to research articles. For more detailed instructions concerning the preparation and submission of manuscripts, consult the Instructions to Authors site at https://academic.oup.com/journals/pages/Author_Instructions.

All manuscripts are reviewed by scientists qualified to judge the validity of the research. Acceptance or rejection, however, is the decision of the subject editor. Acceptance of a manuscript is based solely on its scientific merit. Appeal of a rejected manuscript should be made to the Editorial Board, via the ESA director of publications. Accepted manuscripts are published approximately in the order they are accepted. Manuscript Submission and Preparation. All manuscripts for the journal should be submitted electronically using the online review system, ScholarOne. Go to http://mc.manuscriptcentral.com/eesi and set up an account by filling in their contact information and determining their username and password. Once you have done so, please follow the instructions for submitting your manuscript online. Tables and figures should be uploaded as individual files that are separate from the main document. Authors can subsequently log in to ScholarOne and see the status of their manuscript(s) in their Author Centre. If you have any questions, try using the online Help button first. Or, you can email pubs@wos.com or call 301-713-4313, ext. 1020. Submit your manuscript as an MS Word or LaTeX file with a page size of 8.5 x 11 inches. Type all as double-spaced, with 1-inch margins, and do not justify text. Use the Times New (Roman) 12 point. Use italization only to indicate scientific names, symbols for variables, and words that are defined. Use quotation marks for quoted material only. Use American English spelling throughout and follow the Publication Manual of the American Psychological Association, 6th ed., for guidance on spelling. Number pages consecutively, beginning with the title page. Note that ESA requires that line numbers be used on your submitted manuscript. Begin each of the following on a separate page and arrange in the following order: title page, abstract and key words, text, sections, tables, footnotes, figures, photos, legends, references, and all other criteria for review as set forth in the Instructions to Authors page. The abstracts and key words should appear at the end of the main document.

Page proofs are sent to authors after manuscripts are typeset. Extensive changes to proofs, except for printer and editorial errors and answers to copyeditor queries addressing style or format, will be charged to the author. Reprints (printed and electronic) are ordered at the time page proofs are returned. See the reprint order form for rates. Authors who are members of ESA at the time their article is published are exempt from page charges related to their article. For more information, see the Environmental Entomology website at https://academic.oup.com/ee.

Information for Contributors

Extensive changes to proofs, except for printer and editorial errors and answers to copyeditor queries addressing style or format, will be charged to the author. Reprints (printed and electronic) are ordered at the time page proofs are returned. See the reprint order form for rates. Authors who are members of ESA at the time their article is published are exempt from page charges related to their article. For more information, see the Environmental Entomology website at https://academic.oup.com/ee.

Abstract: Abstract should be an informative digest of the significant contents and the main conclusions of the research. References Cited. Citations in the text should be by last name of the author and date and refer to a reference listed alphabetically by author in References Cited. For further formatting instructions, see https://academic.oup.com/journals/pages/Author_Instructions. Tables. Keep tables to a minimum. Type all parts of each table double spaced, with each table starting on a new page.

Figures. Illustrations are expected to be of high quality and should be suitable for reproduction in print. When first mentioned, a plant or animal should include the full scientific name and the author of the zoological name (Linnaeus) unabbreviated, except for Linnaeus (L.) and Fabricius (F.). Use only common names approved by the Entomological Society of America (http://www.esa.org/pubs/common_names/index.cfm). Otherwise, the manuscript should conform to the guidelines established by the latest edition of the Council of Science Editors’ Style Manual.

Proofs. Page proofs are sent to authors after manuscripts are resubmitted. Extensive changes to proofs, except for printer and editorial errors and answers to copyeditor questions addressing style or format, will be charged to the author.

Editorial Charges. Editorial review changes are assessed on all accepted manuscripts to cover some of the expenses of publishing. The website listed below for current rates. Reprints (printed and electronic) are ordered at the time page proofs are returned. See the reprint order form for rates. Authors who are members of ESA at the time their article is published are exempt from page charges related to their article. For more information, see the Environmental Entomology website at https://academic.oup.com/ee.
